## DETAILED ACTION

### *Election/Restrictions*

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-7 and 10-14, drawn to a device for manufacture of film tracks of a film tube.

Group II, claim(s) 8-9, drawn to a method for the manufacture of film tracks from a film tube.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The common technical feature in both groups is that in the direction of the film tube, before the squeeze roller device, at least one pre-squeeze device is provided which leaves a remainder of air in the film tube, so that in the region between the squeeze roller device and at least one pre-squeeze roller device, a static air cushion is formed, and that the film tube can be slit with the cutting device in the region of the static air cushion. This cannot be a special technical feature under PCT Rule 13.2, because the element is known in the prior art. German Patent Publication No. DE 29621374 (Derwent Abstract Accession No. 1997-110715), published Feb. 6, 1997, discloses a device and method (fig. 2) that provides in the direction of the film tube produced by a blown film extrusion process, before the squeeze roller device (12, 13), a bubble (14) and that the film tube can be slit with the cutting device in the region of the bubble (abstract).

3. A telephone call was made to Harvey Jacobson on April 24, 2008 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to LARRY THROWER whose telephone number is (571)270-5517. The examiner can normally be reached on Monday through Thursday from 7:30AM-5PM est.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Sam C. Yao can be reached on 571-272-1224. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
